

KALIDECK
More than Paper

 **Ranpak® WrapPak® Protector**

**A VERSATILE PACKAGING SOLUTION
WITH AN ALL NEW WAVED DESIGN.**

PACKAGING

Kalideck Antalis specialises in a range of protective packaging products and materials, as well as a range of Green Packaging Solutions.

The mark of responsible forestry

WrapPak® Protector

TIME SAVINGS

Faster, streamlined packaging operations

PERFORMANCE

Outstanding product protection
& improved sustainability credentials

SIMPLE

Saves stock space and simplifies stock control

New paper shape
for many applications

One converter for all your packing needs

Whatever your packing line setup or product protection needs, the WrapPak® Protector (PT) gives you a versatile, productive and cost effective solution. It's a highly programmable machine

that makes the most of the radically new waved paper packaging solution.

FEATURES

- Fully programmable, with multiple modes to meet all operational needs
- Packaging on-demand or in batches – pre-sized and pre-cut
- Supports box lining, wrapping, thermal insulation and block and brace
- Uses sustainable paper packaging material

**VERSATILE
AND FULLY
PROGRAMMABLE**

Paper basis weight: 60 gr/m² | 70 gr/m²

Paper weight: 11 kg | 10 kg

Paper Pallet

Paper load: 48 packs

Pallet dimensions: 120 x 80 110 cm

Pallet weight: 483 kg

VARIOUS APPLICATIONS

Because WrapPak® Protector (PT) can make a complete range of pads and packaging types, it acts as a single source for all of your packaging - from box lining through to block and

bracing. The ability of paper to 'feather' means you can pack the most fragile products with confidence, using on-demand packaging created to your own specifications.

BOX LINING

WRAPPING

THERMAL INSULATION

BLOCK AND BRACE

A NEW WAY TO PACK

The compact WrapPak Protector is designed to make the most of both in-line and packing tables, as well as standalone packing areas.

Several production modes can be used to create the required pad length and amount of pads:

- Foot pedal: on-demand production of individual pads
- Batch: production of pre-set amount of equal pads

- EDS: a new pad is produced once the last produced pad is removed
- Preset: pre-selected pad lengths can be produced
- Recipe: an individual selection of pad lengths and quantities can be programmed.

With the last button on the screen, Statistics, the users are informed about the production parameters of the converter.
