

EPSON OEM INKS

Welcome to the next generation of professional-quality pigment inks

Epson Ultrachrome ink means you can now deliver superb images with highly accurate colours. This newly designed ink-set includes new Photo Black and Matte Black inks to help produce images with stunning levels of detail when printed in both colour and black and white.

SEE THE DIFFERENCE

- Produce high-quality prints with outstanding detail and deep, strong colours.
- Higher Dmax enables a wider dynamic range to reveal detail throughout light and dark areas.
- Two new inks have been developed specifically for the Epson Ultrachrome HD range in order to increase the density level of the pigment and give a high optical density - Photo Black ink & Matte Black ink.
